PROFESSIONAL SUMMARY

Passionate full-stack engineer with deep expertise in crafting robust, high-performance progressive web apps using modern JavaScript frameworks and scalable backend architectures. I care deeply about clean code, intuitive UX, and systems that scale gracefully. Known for delivering modular, maintainable solutions that consistently meet performance goals and exceed client expectations.

WORK HISTORY

Sedin Technologies - Railfactory - Senior Software Engineer

Chennai, India

10/2020 - Current

Owned projects, made key design decisions, learned fast from failures, and grew through collaboration with amazing teammates.

- Led agile teams to deliver scalable web apps across varied domains.
- Built clean, modular code-bases aligned with business needs.
- Made long-term architectural decisions with scalability in mind.
- Worked with designers, PMs, and QA to deliver polished solutions.

Teknuaance Info Solutions - Software Engineer

Chennai, India

07/2019 - 06/2020

Dove deep into clean code, architecture, and internals — became obsessed with better software.

- Built scalable RESTful APIs with Node.js, PostgreSQL, and MongoDB for data-heavy apps.
- Developed PWAs like AMS360 and D-Sci, an end-to-end analytics platform.
- Owned and maintained Olimium, a real-time chat app using WebSockets.
- Applied design patterns and the Twelve-Factor App methodology for modular, cloud-ready systems.

IQVIA - Full Stack Developer

Chennai, India

05/2018 - 06/2019

Began my career building full-stack mobile apps with Node.js, Angular 6, and Ionic 3.

- Built and maintained **Healthcommand**, a secure health record app for families.
- Contributed to core modules in **Healthplug MD** and **PX**, focusing on clean architecture and performance.
- Developed a strong interest in user-friendly healthcare apps and scalable, modular code.

Aosta Software Solutions - Software Engineer Intern

Coimbatore, India

12/2017 - 05/2018

- Built an Android app for inpatient workflows during my internship, gaining hands-on experience with Java & Android SDK
